

Measure Title
Proportion not admitted to hospice
Proportion receiving chemotherapy in the last 14 days of life
Proportion with more than one emergency room visit in the last days of life
Total Cost of Care Population-based PMPM Index
Total Resource Use Population-based PMPM Index
Advance Care Plan
Bereaved Family Survey
Comfortable Dying: Pain Brought to a Comfortable Level Within 48 Hours of Initial Assessment
Hospice and Palliative Care -- Dyspnea Screening
Hospice and Palliative Care -- Dyspnea Treatment
Hospice and Palliative Care -- Pain Assessment
Hospice and Palliative Care -- Pain Screening
Hospice and Palliative Care - Treatment Preferences
Hospitalized Patients Who Die an Expected Death with an ICD that Has Been Deactivated
Improvement in pain interfering with activity
Patients Admitted to ICU who Have Care Preferences Documented
Patients Treated with an Opioid who are Given a Bowel Regimen
Patients with Advanced Cancer Screened for Pain at Outpatient Visits
Proportion admitted to hospice for less than 3 days
Proportion admitted to the ICU in the last 30 days of life
