

**INSTRUCTIONS:** All questions have only one correct answer

1. All of the following are key leadership skills for an effective Family Meeting:
  1. Ability to assist in medical decision making
  2. Ability to respond to spiritual/existential concerns
  3. Ability to sense and manage patient/family emotional reactions
  4. Ability to review medical and prognostic data
  
2. Which of the following statements is TRUE?
  1. Meeting length is optimally 20-30 minutes
  2. Meetings should have no more than two clinicians present
  3. Physicians should stand to indicate their authority to assist in decision making
  4. Seating for meeting participants is optimally in a circle
  
3. When there is “acceptance”, patients or families typically ask all the following question, EXCEPT:
  1. How much time?
  2. Why can't you do more?
  3. What do we do now?
  4. What will happen next?
  
4. If a patient is unable to participate in the discussion, which one of the following is the preferred statement to help families as they struggle to make a decision?
  1. *We can do option A or B, whatever you decide is fine.*
  2. *We completely respect and will honor whatever decision you make.*
  3. *What would you like us to do?*
  4. *What would your father say if he could speak to us?*
  
5. All of the following are good examples of empathic statements, EXCEPT:
  1. *I can't imagine how hard this must be for you.*
  2. *I know how you must be feeling*
  3. *This must be very hard.*
  4. *You have fought really hard for a long time.*
